

Christina Lewis Vizcarrondo

Bonesy

Artist Statement 2022

Christina Lewis Vizcarrondo, aka Bonesy, is an interdisciplinary artist based in Puerto Rico. She combines oil painting with modern technology, such as augmented reality, to create unique and immersive experiences for viewers.

Bonesy's work explores various themes, including nonduality, emotional wellness, and the divine feminine. Nonduality, or the belief that all is one and interconnected, is a central theme in her art. In addition, she aims to promote understanding and acceptance of different perspectives and philosophies through her art, encouraging viewers to consider other ways of living and thinking.

In her oil paintings, Bonesy uses augmented reality to create interactive elements that allow viewers to engage with the artwork in a new way. These paintings often feature ambiguous figures, leaving room for interpretation and allowing viewers to bring their own perspectives to the piece. In addition, the use of tropical plants inspired by Puerto Rico's rainforest, El Yunque, adds to the ethereal and otherworldly quality of Bonesy's work.

From the earliest examples of art created with technological tools, such as the use of the printing press in the production of prints, to the more recent explosion of digital art and multimedia installations, technology has always played a role in the evolution of art. With the advent of new technologies, such as AI/AR/VR, artists like Bonesy have created and disseminated their work in previously unimaginable ways. As technology advances and becomes more integrated into our daily lives, exploring art and technology will likely remain a

central focus in the art world. Whether it is used as a tool to create new forms of expression or as a means of critiquing and questioning the role of technology in society, the intersection of art and technology will continue to shape how we think about and experience art. Bonesy's art pushes the boundaries of technology and traditional artistic practices, blurring the lines and creating a unique and thought-provoking viewing experience for her audience.
